

SPOTLIGHT _x THE FESTIVAL

GUIDANCE NOTES
SCIENCE

SCIENCE

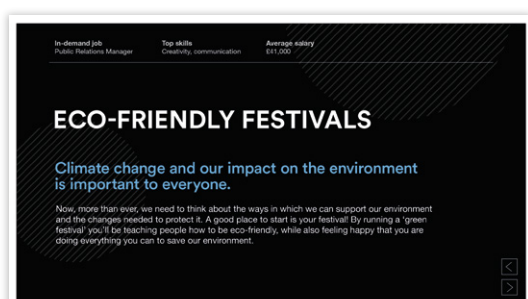

Remember the Introduction section must be completed first. The science presentation includes the activities:

- Eco-Friendly Festivals
- Alternative Solutions

The following printable resources are needed:

- Alternative Solutions (A5 or A4)

Each activity begins with a PowerPoint presentation that includes a group task and a follow-on resource to be carried out by students.

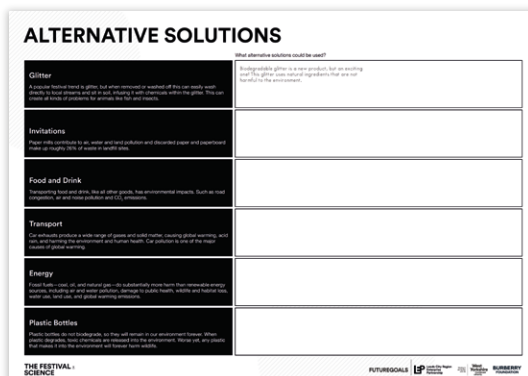

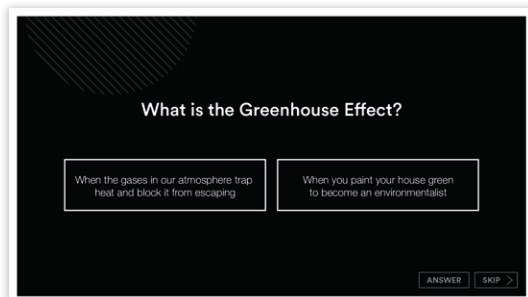

Eco-friendly Festivals

Slides 2–17

The purpose of this activity is to highlight the importance of making an event as environmentally friendly as possible, while also highlighting the current problems associated with outdoor events. Students will become aware of the simple changes that can be made to improve our impact on the environment. After the initial explanation slide, students can take part in a climate change quiz, 'How much do you already know about climate change?'

Students will then need the 'Alternative Solutions' resource. The resource includes six different aspects to a festival that can be harmful to the environment. Students need to think of alternative solutions for each section.
